Digital Engineering: Optimizing Construction's Digital Future. While there remains no agreed universal definition, our exploration of digital engineering has led us to the conclusion that it is not just the uptake of new technologies but, instead, the concerted effort to use smart technologies to unlock greater value across the entire lifecycle of a capital asset.

Digital Engineering: Optimizing Construction's Digital Future

Throughout Our Digital Futures we have highlighted the key barriers and challenges organisations are facing around digitisation and the opportunities it presents - from improving digital literacy and owning digital strategy at senior levels, to embracing data and new technologies to improve asset and organisational performance, connect systems, upskill the workforce, and systematically anticipate change.
