Geometrical shapes - Hundreds of tangram puzzles to solve

The ancient Chinese art of tangram puzzles is a popular mathematical problem solving activity, finely tuned to bring out the best in pupils. The tangram puzzle consists of 7 geometric pieces which are normally boxed in the shape of a square. The pieces, called 'tans', are used to create different patterns including animals, people, numbers, geometric shapes and many more.

All categories of tangram patterns - Providing teachers ...

Show students how the tangram puzzle is actually a large square that is divided into smaller shapes. Hold up each of the shapes and use the Vocabulary Cards and Glossary to name each shape, having the students repeat the name back to you. Explain that you can use some or all of the tangram puzzle pieces to make different shapes, as in the story.

Tangram Puzzles: 500 Tricky Shapes to Confound & Astound ...

Tangrams. Tangrams are believed to have originated from China during the Song Dynasty (960-1279) and were not introduced to the Western world until the 19th century when they were brought to Europe by trading ships. The goal of the game is to fit all of the pieces in to a shape without any overlapping. Benefits: Tangrams is an excellent example of a spatial visualization/spatial reasoning game.
