## **Water Mist Catcher Marine Engines**

MAN B&W engines are equipped with a water mist catcher (WMC) to remove the free water from the scavenge air. This is necessary to prevent the water from carrying over into the combustion chamber, which would have a negative impact on the cylinder condition. The efficiency of the WMC and the drain system is extremely im-

Some companies such as Snow Performance and AEM are now offering easy to install water/methanol injections systems that are available for naturally aspirated or forced induction gasoline and diesel applications. These systems inject a roughly 50/50 mixture of methanol and water into the engine using a high-pressure pump. This mixture allows for more ignition timing, [...]

With this type of marine engine, you'll typically get 4 or 6 cylinders, much like you would with a car engine. That's why this type of engine is typically considered more powerful than outboard motors. Of course, the marine motor you choose should be the one that best fits your boat and all its components.
