### NEW JERSEY NJTR-1 CRASH REPORT MANUAL

Welcome to the Procedural Guide for Self-Insured Claims Administration. This manual is a reference and training guide for the employers whom BWC has granted the privilege of self-insurance in the state of Ohio. The rules, regulations, forms and procedures described in this manual are in effect as of the date of this publication.

### Procedural Guide for Self-Insured Claims Administration

The 'windpipe' is the layman's term for the trachea. Tracheal injuries are not, always fatal although airway problems can be significant. A 'crush' injury would be considered 'blunt force trauma' as opposed to a penetrating wound. Strangulation could cause such an injury - as could blows to the trachea from fists or feet.

### What happens if someone's windpipe is crushed? - Quora

Injuries to lips and oral mucous membrane are easily caused if adequate care is not taken during laryngoscopy, insertion of laryngeal masks or manual maintenance of the airway using a face mask. Most injuries heal uneventfully, but may be quite distressing after operation.

### Injury during anaesthesia | BJA Education | Oxford Academic

Level 1 injuries involve the distal metacarpus/metatarsus and phalanges and include the fetlock joint and extensor and flexor tendon injuries located at the level of the metacarpus and metatarsus. Level 2 injuries involve the mid-metacarpus to distal radius, the carpal joint, and the mid- to proximal metatarsus.
